Installation method

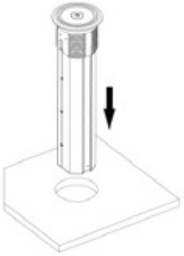

Installation conditions:

The thickness of the installation planeis between 5mm and 40mm, and the plane opening size is 102mm.

Step 1:

Pull down the locking ring, washer and retaining ring installed on the product clockwise along the thread.

Step 2:

Insert the socket vertically into the reserved 102mm table hole.

Step3:

Take out the locking ring and retaining ring aligned with the holes and install M3 * 28 screws.

Step4:

Turn on the washer, the retaining ring, and the lock ring in turn counterclockwise along the thread.

Step 5:

After tightening the locking ring counterclockwise along the thread, tighten the screw with a Phillips screwdriver,and then complete the installation.
